### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

US Patent No. 5,863,671 (SPEAR, Jr. et al.) discloses a fuel cell construction comprising window frame platelets with (electrode membrane assemblies (EMAs) of carbon paper over the catalyst/carbon-black coated membrane to provide a highly porous sheet having random gas distribution channels there through. In producing the window frame platelet, the window pane area is defined in the appropriate medial areas of the plate that is located interiorly of the outer plate edges. (Lines defining the pane area may be through-formed except for a few thin bridges holding the window pane section in place during platelet fabrication. The bridges are later cut and the pane removed, or let fall out, to complete the window frame platelet.)

US Patent No. 6,127,058 (PRATT et al.) discloses planar fuel cell including a membrane electrode assembly sandwiched between two current collector assemblies. The membrane electrode assembly is a single sheet of a polymer electrolyte membrane with an array of anodes on one side and an array of corresponding cathodes on the other side. The current collectors can be supported by a plastic frame, and they have an interconnect tab that provides an electrical pathway to the exterior of the membrane electrode assembly.

However, the prior art references of record filed to teach or suggest what is instantly claimed, in particular,

A process of forming at least one framed membrane electrode sub-assembly comprising:  
a.) forming at least one framed membrane electrode assembly component comprising an external frame having a plurality of bridges, and at least one element having a plurality of outer

edges, wherein the at least one element is connected to the external frame via the plurality of bridges, thereby forming a unitary structure;

b.) forming a carrier material having a plurality of apertures defined by a plurality of inner edges; and

c.) securing the carrier material to the at least one framed membrane electrode assembly component, wherein, the external frame, and plurality of outer edges of the at least one element are supported by the carrier material, thereby forming at least one framed membrane electrode sub- assembly. (*Claims 1-26*)

A framed membrane electrode sub-assembly prepared by a process comprising:

a.) forming at least one framed membrane electrode assembly component comprising an external frame having a plurality of bridges, and at least one element having a plurality of outer edges, wherein the at least one element is connected to the external frame via the plurality of bridges, thereby forming a unitary structure;

b.) forming a carrier material having a plurality of apertures defined by a plurality of inner edges;

c.) securing the carrier material to the at least one framed membrane electrode assembly component, wherein the external frame, and plurality of outer edges of the at least one element are supported by the carrier material, thereby forming at least one framed membrane electrode sub- assembly. (*Claims 27-28*)

A framed membrane electrode assembly array comprising a framed membrane electrode sub-assembly prepared by a process comprising:

a.) forming at least one framed membrane electrode assembly component comprising an external frame having a plurality of bridges, and at least one element having a plurality of outer edges, wherein the at least one element is connected to the external frame via the plurality of bridges, thereby forming a unitary structure;

b.) forming a carder material having a plurality of apertures defined by a plurality of inner edges;

c.) securing the carder material to the at least one framed membrane electrode assembly component, wherein the external frame, and plurality of outer edges of the at least one element are supported by the carrier material, thereby forming at least one framed membrane electrode sub- assembly. (*Claim 29*)

A fuel cell comprising a membrane electrode assembly produced according to the process of Claim 14. (*Claims 30-36*)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
